Select all that apply. Do you think there should be restrictions on the use of cannabis? :

Personal use of cannabis should be legal. , Cultivation of cannabis for personal use should be legal.

YOUR SUBMISSION

Submission:

The current war on drugs has failed and continues to turn otherwise law abiding citizens into criminals for using a substance less harmful than a fair few legal ones , I pointed out to the police minister in SA back in 2004 that by going tougher on cannabis they will force the mum and dad growers out of the market and leave the increased profits to the organised elements leaving them free to use the profit from cannabis sales to buy ice I was told at the time I didn't know what I was talking about yet less than 5 years later according to waste water testing SA was turned into the world's ice capital ? , Personally I feel that cannabis use should just be made legal no medical no personal just legal it will remove barriers that exist both legal and social and provide for a much better public health outcome for all involved police and the court system won't have expensive costs involved with enforcement costs that are not recovered , personal cannabis use should fund medical use , indoor grow needs to be allowed as it's best for security a wattage limit could be set for personal use , co ops and compassionate clubs need to be allowed so those that can't grow have a place to go and learn ? I got charged with 8lb of cannabis and 4 plants in Adelaide and ended up with \$320 victims of crime levy as a result when u add up the court and the amount of police time used it's a no brainer that personal cannabis use should be legal

Green fairys or compassionate provider's play a important part in the treatment of hundreds of medical patients in Australia patients that when left to the medical profession are dieing , yes these are folks that are not trained doctors yet here they are saving lives , patients access these folk out of frustration at the red tape that continues to block access to affordable legal products . Australia needs to get it right and the time is now not in ten years ?

Many thanks ██████████ xox
