Are there any additional themes we should consider?

It is merely a plant, that has been used for centuries. With more uses than 'getting high', cannabis has the potential to change many of our 'modern' practices.. ie.. Plastic, paper, fuel, clothing.. Besides a (generally) harmless medicine, the list goes on.

Select all that apply. Do you think there should be restrictions on the use of cannabis? :

Sale should remain illegal. ,Personal use of cannabis should be decriminalised.

(Decriminalised: there are no criminal or civil penalties instead a person is referred to a drug diversion program or other health/ treatment service), Personal use of cannabis should be legal. ,Sale of cannabis should be legal and regulated. ,Cultivation of cannabis for personal use should be legal., There should be no restrictions. ,Other – please explain.

Cannabis/hemp is a natural plant. Used for many centuries before 'the war on drugs'. It is far from dangerous. It can replace many of the current pharma 'drugs' with less side effects. NO-ONE has ever died from cannabis. Not ever

YOUR SUBMISSION

Submission:

I could upload many references/peer driven reviews, facts.. Where would I start? Thousands of years ago? There is enough recent evidence from around the world already.

Do you have any additional comments or suggestions?:

Under schedule 1/class A...

'A substance that has NO medical or therapeutic benefits, and/or a high level of abuse.'

If nothing else, modern times have shown it has medical and therapeutic benefits; With a level of abuse no higher than alcohol or tobacco. Arguably less..
