E) all aspects both positive and negative should be assessed in relation to the use of cannibis. Its no longer 1990 where your typical user will sit at home and achieve nothing. Nor is the stigma that its a gateway drug appropriate in 2020. Business professionals, academics, and for lack of a better term lower socio economic demographics are all known users each achieving what they need to on a daily basis. Those who want to access will. Its those who can not access that need access like those suffering mental health problems, terminal illness, chronic pain that need to be provided this precious resource. Find a way to tax it and legalize it. No war ever started because they were high.
