While I do not work in the health sector, I am an advocate of the health benefits that can result from CBD use.

Also, as a taxpayer, seeing how taxes gained from legal sale of cannabis have been positively used in other countries seem like it could be a major draw card/benefit for our country.

Are there any additional themes we should consider?

Select all that apply. Do you think there should be restrictions on the use of cannabis? :

Personal use of cannabis should be legal. , Sale of cannabis should be legal and regulated. , Cultivation of cannabis for personal use should be legal.

YOUR SUBMISSION

Submission:

The legalisation and regulation of cannabis, much like in other countries who have implemented such procedures, has the potential to bring in beneficial tax revenue for important social benefits such as education, health, transportation, communication, infrastructure, etc; can free up law enforcement resources to focus on more vital issues; while regulation of cannabis in a similar manner to alcohol in countries where it is legal, cannabis has been shown to have fewer negative health effects than alcohol - even medicinal benefits; I believe that furthering the education of cannabis usage can minimise the misuse and underage consumption of marijuana - as can regulated sales, ceasing the underground market that does not enforce age limitations or quality/potency assurance to its customers.
