YOUR SUBMISSION

Submission:

Personal, non-medicinal use and cultivation of cannabis for personal use should be legalised for those over 18 and decriminalised for those under, bringing us in line with many other countries around the world - the evidence is just no longer there to support this being an issue we should even be arguing about anymore, recreational use is so widespread, governments are missing out on much needed tax dollars and the plant is being used to criminalise vulnerable members of society while everyone else gets off scott free. There's no public good to keeping it illegal and the effects of decriminalisation won't counteract the cat that's already out of the bag - look at it as a source of tax like cigarettes and alcohol and legalise it already please and thank you (nb I don't smoke)

Do you have any additional comments or suggestions?:

Promise I'd actually prepare a statement and not just reiterate this garbled nonsense from my phone
