I am a resident living in a retirement Village and these are the matters I wish to bring to your attention as to what us as residents have had to endure over the years.

If there had been an ombudsman in the industry many of these things would not have happened or they would have been resolved quicker and at far less cost.

Stormwater drains and pits – Contract ambiguity

Structure has not been done correctly when you remove the lid there are no bottoms on the pits. The pits have to be rebuilt and I believe that this contributes to the flooding within the village into the units. This coupled with inadequate drains means that my place floods. Each time I have to get my carpet dried, mildew forms and causes more issues I should not have to live this way. I am lucky that the Association has paid to fix the issues but the problem comes about because of the defective workmanship that has resulted in these problems. The village is over 38 years old the draining system is too old especially as it is out dated plumbing system, the system needs to be renewed surely this is an Owner responsibility as the system is unable to handle the flow of water flowing through with all the development around the village.

Car Parking– Contract ambiguity

We have 206 units in our village, we have 4 car parks for our visitors, if we have the hairdressers and doctors onsite it means that there is only 2 spots left for all of us residents. The corporate owner has to give permission for the village to put the car parks in but the Association is expected to pay for the car parks. Surely this is an owners responsibility. They were on the original plan so the owner should have put them on the site when in development it is clearly capital works the outcome for me is I can not have visitors or services to my unit and this is clearly unacceptable and why should I be made to pay for capital works. An Ombudsman may be able to apply pressure to fix this problem at our village. Cracking in walls and ceiling inside and out 2006-2016 – Contract ambiguity

The Contract states that I am responsible for the inside of my house. That is all well and good but the workmanship I faulty to start .As a leaseholder , where does the repair stop and the structure begin. How big has a crack got to be, I can see daylight, there is a draft..is that enough?. This has worried me ever since I came in, there have been cracks on the outside of units including mine. I came into the village to enjoy my life what was eft I worry how bad the cracks have to be to be fixed, how long do I have to pay for hefting before it is fixed? The Committee of Management have battled with this for years and finally in 2016 they has accepted responsibility and fixed the problems after the village engaged a Consultant to help the Committee fight for a fair outcome. An ombudsman means I would have been able to state my case and have a fair hearing and hopefully some action within a shorter period of time.

Footpaths– Contract ambiguity

Our village is unsafe, there are not enough paths for us to walk on and we have to walk on the narrow roads, the paths are so old they are a tripping hazard and need to be replaced. I worry that I'm not as good on my legs as I once was and if I fall I will do extensive damage to myself. I know the Committee of Management does the best it can sanding down the areas but the paths need to be replaced and due to the cost the corporate owner doesn't address the issues and nothing gets done. I like to walk and I find that this has impeded by health as I cannot safety walk around the village.

██████ Pit– Contract ambiguity

If I lived on in a residential area ████████ would attend to the repairs or issues in the pit, at their cost, alas we are not we are in a retirement village so ████████ reply is it is private property and we must engage one of their qualified Telstra Contractors and pay for it. I'm not in a gated Community Im on what amounts to a residential block I am disadvantaged by this line in the sand when it comes to services we have an emergency call system it is important that the pits are in good walking order otherwise there will be a death. The outcome is I can't get the Manager to call and get the issue resolved I have to make the call to restore phone. An ombudsman would be able to get Telstra to do what they should do.
