Multiple Intelligences & the Gifted Brain: Guiding Teaching Practice

Thursday 12th September
7.30pm

Banyule Primary School

Multiple Intelligences Theory has been used widely in classrooms to provide for gifted students. In combination with Bloom’s Taxonomy it is used to create a ‘Grid’ to assist teachers in planning classroom provision. This seminar is designed to present new brain research results that may help to clarify issues in gifted education and inform classroom teaching practice in a practical way.

Presenter: Rhonda Collins
Gifted Education Coordinator
Mill Park Heights Primary School

Rhonda has been working in the area of gifted education for nearly twenty years. She has a Grad. Dip. Special Education & Human Services (Gifted Education) with Distinction and is currently completing her Masters of Education by Research (Gifted Education). She has served on the DE&T Gifted Education Working Party for Program Development and Working Party for Professional Development. Rhonda was invited to present to the Senate Select Committee Inquiry into the Education of Gifted Children and is currently working with La Trobe University Bendigo to present the Daedalus Program for gifted students.
