I am concerned re the possible funding cuts at CGSC. The music program has been both rewarding and enjoying for our daughter, The music staff at the school are very committed and encouraging to the pupils. Learning an instrument is not always available to children but at CGSC it is offered no matter what the individuals talents are and it promote's confidence in the students and encourages their involvement in school activities . The music program also helps with socialisation amongst different classes and year levels, Music is an essential part of school curriculum.

At present all we hear and read about is funding cuts !! We need to spend money on education if we want to have well rounded individual children in the future. These are the work force of the future and future taxpayers. Please reconsider any funding cuts.

Thank you.
