RE: INQUIRY INTO DRUG LAW REFORM

Approve drug safety

To whom it may concern,

As we are all aware of the ongoing issue of party drugs leading to youth deaths. We cannot continue to ignore this issue and not educate our children.

I myself was very lucky to be raised in a house with open drug education. My parents didn't tell me to do them or not to do them but they did take the time to sit down with me at a very young age and educate me about MDMA, pills, LSD etc. Once I understood how they work and effect the brain and body I made my own choice and did NOT want to take anything. For the rest of my teenage years all my social network were experimenting with drugs but me. I lost friends who were close to me and saw some really tuff situations which all could have be avoided by education. Pill testing is just one Steph towards re educating our youth to be more aware of drugs.

Don't be stupid and pretend the issue doesn't exist while our children are killing them selfs from something so avoidable.
