RE: INQUIRY INTO DRUG LAW REFORM

Pill testing saves lives

As the mother of 18 year old twins who love their music both as performers and festival attendees, it's terrifying to hear the stories of young people who have been victims of the illegal drug industry. They are adults and I can no longer control their choices and actions. My preferred action would be the legalization of marijuana however that would not eliminate the abuse of so called 'party drugs'. Please provide pill testing so that festival attendees have some protection from the chemical cocktails that these pills could contain. Keeping in mind that the human brain doesn't reach full development until the mid twenties we have a responsibility to set safe options for young people.
