Subject: Drug lab-testing is vital to save lives!

RE: INQUIRY INTO DRUG LAW REFORM

Drug lab-testing is vital to save lives!

I am a grandmother and am realistic enough to be deeply concerned that my grandchildren just might experiment with drugs even though I and their parents would prefer that this doesn't happen. Seeing how young people have died because they did not know what was in the drugs they had bought adds to my anxiety.

I therefore endorse and plead with you for the need to have lab-grade pill testing as a way to avoid these tragedies. It is much simpler and cheaper than the horrific consequences of dealing with the tragedy of these young deaths. Unfortunately people are going to take drugs. Prohibition has never worked. How much better that they have the opportunity to make sure they are safe through this testing arrangement. Making it home safe and alive is everyone's goal and worth it!
