Subject: About drugs and its destroying too many people

RE: INQUIRY INTO DRUG LAW REFORM

About drugs and its destroying too many people

I support this call about drugs being controlled. The problem is set deep in our lives and we must try to find out what is causing this problem. The young are unemployed and I see every day in the local city of Footscray beggars a growing problem within our cities that our young have no future and find themselves unable to work and have the thought that the problem lies with them and in fact the authorities do not have answers under our present way of living. This means we must sit down with Trade Unions and other progressive groups for change in terms calling on the government to act in opposition to drugs and poverty.
