Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Bishop Andrew Curnow

SUBMISSION CONTENT:

--

I have significant concerns about the current management of Victorian country roads. There are huge gaps in regular maintenance. For example the road verges in many places along the Calder are not regularly mowed so that intersections are clear and sight lines maintained. On the Loddon Valley Highway much of the road edge is in a broken and sunken condition, and parts of the Calder surface between Wycheproof and Sea Lake the surface is very rough and uneven.

On the Calder nearer to where I live a recent storm left significant debris on the highway; a crew came along and threw it off the central highway but pieces of wood and debris remain of the highway edge now.

Nearer to Bendigo the Calder and its surrounds are untidy with a significant amount of rubbish on the verges.

Vicroads should be split and there needs to be a radical shake up in the senior management and its management of rural roads and highways
