Inquiry Name: Inquiry into VicRoads' Management of Country Roads

mr jim mcwilliam

SUBMISSION CONTENT:

--

I have had meetings with the vic roads engineers re their proposal to create a 400 mtr long ,four lane divided road including two dual lane roundabouts in Newhaven Phillip Island . 25 million dollars of work .They stated they have NO plans to create divided road anywhere else in the vicinity , that includes the existing two lane bridge. When i asked "how they thought this may help traffic flow on the four or five busy days per year " they had no answer !!! vic roads should not be in control of phillip islands traffic/ road plan !! because they are not up to the task !! This area needs a specialized traffic management plan . Vic roads are not capable of the thought process !
