Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Ms Maureen Drennan

SUBMISSION CONTENT:

--

My partner and I have had the pleasure of recently driving in many areas around Australia. We have consistently commented that even the country roads in most places are better than the highways in the South West of Victoria.

This is to say nothing of the condition of our country roads; many are simply dangerous to drive on.

You have to be constantly aware of rough areas and large holes that could easily cause a car to be damaged or worse result in an accident.

Our citizens rely on our roads, many have to travel long distances in everyday life, for schools, work and sport. We don’t need to be risking our lives.

Our South West roads have been neglected far too long and I cannot emphasis enough the importance of the need of urgent action to upgrade our roads.

Please - we don’t want to become a marginal seat or worse a Labour seat.

Regards

Maureen Drennan
