This is a submission to Parliament about the appalling state of South West Vic roads and VicRoads refusal to address this problem. Our roads have been deteriorating for many years and we have complained to our local shire, state and federal members of Parliament with little result. The potholes and road edges are dangerous and we have experienced four broken wheels and tyres. Occasionally VicRoads will fill potholes but not before they become dangerous. Their repairs usually last less than a week. Their usual response is more "rough surface" signs to add to the hundreds we already have.
