SUBMISSION CONTENT:

We are glad that we have an opportunity to express our concerns in writing as we have had face to face meetings with VicRoads representatives and our Member of Parliament as well as phone calls about the issue on the north side of the Loddon river in Newstead and have not had a satisfactory response. We are talking in particular about the Creswick-Newstead Road in the vicinity of the turn-off from the Daylesford Road (C285) onto the Creswick Road over the old railway line until the 100 km sign towards Creswick. This is an area used often by people (including children) walking and cycling and crossing. In the area is a children's/adult park as well as the Railway Hotel where us locals are able to observe the very dangerous traffic situation while sitting outside four metres from the road - mostly excessive speed and overtaking on the solid line. We are doing this so that we can hopefully avoid ever having a tragedy in the area. We were going to start a petition where we would have had no trouble getting heaps of local signatures, but as this opportunity has come up, we're using it. We hope that there will be more community consultation if the local councils have more say and that the local road situations will improve. But whatever happens we are glad to be able to bring this to the attention of government instrumentalities both local and state that are meant to be looking after road safety in Victoria.

Re: submission from Robert and Audrey Mancor

We would like to make a correction.

We met with the Vicroad representative but only communicated with our MP via letter in which she followed up and responded.

Thank you
Robert & Audrey Mancor
