Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Mrs Jacqueline Bagnall

SUBMISSION CONTENT:

--

As a regular driver on the Henty and Glenelg Highways, I am appalled at how unsafe these roads can be. The regular usage by heavy haulage damages the edges to an unsafe level and continue to cause pot holes, often very difficult to see in poor light or darkness. Even though the potholes are filled, not long after, they are back to the original state. These areas often have poor drainage that need more than just a short term fix. The other problem seems to be eucalypts that are allowed to grow close to the verge and these must cause damage to the base of the highways. An example at the moment is between Hamilton and Cavendish. Better maintenance through more expenditure would make these highways so much safer. Our highways are being ruined by the regular blue gum logging trucks.
