Many Country roads we know are 100 because the rule of "lack of signs" but more and more im seeing dangerous behavior particularly from city drivers P platers and New Australian because someone will do 80ks and build traffic up behind. There's combination of fear of overtaking & Late overtaking. Making matters worse all. I ask for 100k signs posted on more C class Roads particularly near intersection because when i don't have traffic infront of me i have ppl failing to give way from stop signs while at speed. Dropping the limit 80 i have seen makes poor behaviour increase
