Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Mr John Parnell

SUBMISSION CONTENT:

--

I travel the South Gippsland Highway from Meeniyan to Cranbourne. Many of the roads reconstructed in the last 15 years have had areas of failure and have had patches dug out and remade. This indicates that:-
- the design life is inadequate
- or the specification is inadequate
- or the construction supervision is inadequate
- or subsequent maintenance is inadequate.

I am a Civil Engineer and worked for the MMBW/Melbourne Water constructing sewers and water mains. I have trouble accepting that so much money can be spent constructing roads to have them crack up in such a short time.
