To who it may concern,

RE; Inquiry into VicRoads Management of Country Roads

I fully support an inquiry into how funding is spent by Vic Roads as a whole and in particular Road works, where does the money go? let the public know.

As a resident living on the edge of the fastest growing Shire (CITY OF CASEY) our road has deteriorated quite considerably over the last few years with the additional traffic from both heavy transport and domestic vehicles, with this also comes speeding motorists, accidents and a fatality.

My recent written concern to Council virtually fell on deaf ears, with a pass the buck approach, that it is another institutions issue, for one, Vic Roads.

As I drive around country roads, many of which are now close to new development. I am astounded at the number of motorists who do not adjust to the poor condition of these roads and at speeds of 100kph or more, any wonder theirs country accidents.

From what I gather the lack of funding is a major part of the deterioration of our road network, so the current inquiry is well overdue for the safety of the general public.

YOURS FAITHFULLY

WARREN FOSS
