Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Mr Daniel Mclaughlan

SUBMISSION CONTENT:

--

I write with reference to the appalling state of the Hawton Rd (Echuca Rd.) between Shepparton and Echuca, south-east of Wyuna.

This road has been in a deteriorating state for several years and now has extremely large potholes in multiple areas. This poses a massive risk to road users and slows down the flow of traffic between Echuca and Shepparton, a route that numerous people take to and from work each day.

The interim solution imposed 6 -12 months ago was to reduce the speed of this stretch of road to 60KM/h. This is unacceptable in my opinion, given that the road has remained in this state for a prolonged period of time.
A number of minor projects have occurred in the immediate surrounding area to patch other, less serious pot holes, however the specific stretch referred remains untouched.
