I live in rural Victoria and the roads are a joke. I also do a lot of driving within Victoria and interstate and our roads are by far the worst in the country. Our roads are full of major pot holes and rough / broken edges, yet on the rare occasion that the authorities take any action they seem to think that putting up "Hazard ahead" signs is a safe alternative to actually fixing the roads. I was recently travelling on the Hamilton Hwy which is a fine example of road maintenance neglect, and had no sooner passed an infamous Hazard ahead sign than I passed a speed camera!! Really Daniel Andrews???? If this government was serious about lowering our road toll they should be fixing our roads and by using contractors that actually now what they're doing. Lets start holding our road workers to account for the crappy quality of work they do too. Obviously over-quoting and under-delivering. A fine example of this is the current works taking place on the Bendigo-Murchison Rd between Murchison & Rushworth - have spent the last week resurfacing the road. In saying that, they have not bothered to actually repair the potholes or uneven surface. They have simply poured tar over all of the existing problems. What a complete waste of time and money. In saying that I would also like to know who oversees the training and compliance of employees. Whilst driving west to Rushworth last week, beyond the road works and in a 100 kph zone I had a truck do a uturn in front of me just after a corner. It is very fortunate I drive a brand new car with an excellent braking system. I also have a camera in my car which recorded this extremely dangerous manoeuvre. I would be pleased to pass this to the authories for action. We as Victorians have had enough of having our lives and the lives of our loved ones put at risk because of the neglect of road maintenance. It's time for the fat cats to start doing their jobs properly and get things right!!!
