Inquiry Name: Inquiry into VicRoads' Management of Country Roads

Mr Andrew Carter

SUBMISSION CONTENT:

--

I am disappointed with the lack of repair work being done on regional (and metro) roads. The only solution VicRoads seems to use is to lower speed limits instead of repair works that are long overdue, then claiming that those roads are safer. This does nothing to address road surface quality and users such as motorcyclists and cyclists lose out. Their other tactic is to simply put out "rough surface" signs, again...they acknowledge the road surfaces are an issue, yet leave signs in place instead of addressing the cause of road surface issues.
