I am writing to highlight the appalling state of the Hamilton Hwy between Geelong & Inverleigh. This road is used by a multitude of vehicles daily and has been neglected for far too long. One particularly bad patch has not seen any repairs for over 6 months, the only concession being speed reduction signs which are largely ignored.

I have seen many instances of vehicles (often trucks) swerving to avoid potholes into the path of ongoing traffic.

This highway is a very popular access to Western Victoria as once past Inverleigh there are few towns or speed restrictions therefore trucks and holiday makers use it in preference to the Pacific Hwy.

I urge you to recognise the importance of this road and to take action before another fatal accident occurs.

Des Joyce
