This is probably not going to make a difference but I really hope it does. The roads in the South West of Victoria is in the worst condition it has ever been. Traveling around this area is dangerous with the potholes and corrugations on the road surface, especially on a motorcycle. The repairs that are made to some sections of road is even worse after a short period of time as the repairs are not done properly and the road was probably not constructed with heavy vehicles in mind to start with.

I suppose if you use the cheap and nasty contractors you cannot really expect anything better than cheap and nasty.
