Inquiry Name: Inquiry into End of Life Choices

My wife and I are not afraid of dying, but are very afraid as to how we die. We are strong believers in Voluntary Euthanasia and find it very difficult to accept the stupid Law that exists in Australia which prohibits us to make a choice how we wish to die when the time comes in which "Living" becomes unbearable. We exist to live, but not Live to exist. We have clearly written "Advance Directives" stating our wishes. We are also long time members of DWD and Exit-International.
