

7th October 2009.

Mr Sean Coley,

We have already placed in a submission opposing the UGB expansion, my husband and four children are all against this decision. Our submission is against destroying this beautiful environment we have, the Growth Boundary that is in place still has not been fully developed and the boundary in place was suppose to remain for many year to come. What a absolute disgrace that all the people involved in expanding this boundary, are only thinking of their hip pockets and not our futures. We were already dead set against an expansion in our last submission but this time we are determined to do every thing we can to stop or make it so difficult for all those involved. As you don't seem to care how difficult you are all making it for us self employed home owners trying to survive raising 4 kids. I just spent 1 hour sitting by the side of the road with a young joey that had obviously been hit and left. After many phone calls the police finally attended to put the poor little thing out of its misery. As a mother of four children, running a home, running a business and studying I feel I have better things to do with my time, but because you all think it is better to destroy the environment and all the habitat for our native animals than to see sense. This is only one of many kangaroos killed on our road this past two months and why? because of the new "Mandalay" estate and expansion. Why should I try to explain to the kids why it is necessary

to witness these deaths everyday. We moved out here for peace and quiet, to hopefully retire here someday, bring our kids up happily in a country environment they are quite happy here on our 10 acres they never complain of being bored or ask to walk the streets or shops and two are teenage boys!

We have planted many native trees to help the environment and wildlife busted our guts to get this home to where we want.

The most annoying thing is we would love to buy more land out further but we can't because the bank do not want to know us because if the UGB and GAIC go through we are buggered!

Being self employed is hard enough let alone trying to cope with this worry my husband who I have been with for 27 years is actually fighting depression now, but you still think it is still OK to expand and involve innocent hardworking families.

We will be presenting in committee with Taxed out and we will fight this with all we have. We are doing this for our children and future grandchildren as we feel they deserve better we keep enforcing on them global warming and caring for the environment then you want to take more land what hypocrites. It is wrong immoral and ~~desperat~~ stupid to expand this UGB. Leaves thing be and think of all our futures not the money. Melbourne is big enough stop importing people and think of lack of water, drying of rivers, fires. Logic must play a part in this.

Regards The Young family
