 Subject urban growth boundary

History: This message has been forwarded.

We must go back to the 2030 plan, and MAKE it work!. This new urban sprawl is so wrong on so many levels. Please stop this destruction of Melbourne.

 Subject no urban sprawl

History: This message has been forwarded.

the new boundaries will result in the alienation environmentally sensitive areas, it will alienate grazing and farm land , and at a time of global warming we may need to consider this, it will create a two tiered society with the outlying areas becoming second class and poorly integrated into the city proper. we must make the previous "up, not out" 2030 plan work, and the government must have the political will to do the difficult but right thing, rather than just pike out and release more land which is expedient but will be a disastrous legacy.
