

**Note**

1. COVID-19 data are extracted from the Public Health Event Surveillance System (PHESS) and are current as of midnight 30th November 2020. All data

2. Definition of healthcare workers in aged care:

Healthcare workers (HCWs) in aged care are people whose work involves providing clinical care to patients or clients in an aged care setting. This may include HCWs who are considered to work in an aged care setting if they are linked to an outbreak in a residential aged care facility. One or more cases among staff

3. Inclusions and exclusions

A small number of HCWs that work in aged care settings also work in other healthcare settings; they are included in this Aged Care dataset.

HCWs that work in other settings (not aged care) can be found on the Healthcare workers spreadsheet (the two datasets are mutually exclusive).

4. In-home aged care

\*\*The daily numbers of infections and deaths among in-home aged care recipients cannot currently be provided, because the department does not have

undergo a process of review and correction and are subject to change. This dataset will be updated monthly on the Department of Health and Human Services website. The dataset includes COVID-19 cases among nursing home residents, staff, and visitors. It includes cases among nursing home staff that include nurses, personal care assistants, allied health, doctors, etc. It does not include non-clinical ancillary staff such as cleaners, food handlers and administrators. A case among nursing home residents or residents in a facility is considered to be an outbreak.

The Department of Health and Human Services is seeking to reconcile State data with the Commonwealth for this category. We have complete data on COVID-19 cases among in-home aged care recipients and are seeking to reconcile State data with the Commonwealth for this category.
