YOUR SUBMISSION

Submission:

As a Victorian I, like many thousands, have tried to do my part in minimising the the transmission of this killer virus.

We are numb from information, misinformation, numbers, statistics etc.etc.

Every few weeks we are given another goal then when we think we are within reach we find the goalposts have moved.

Current numbers, according to health ministers, indicate that Victoria is below the threshold for opening up our state. If so why is it not happening?

What is Premier Andrews trying to prove?

Our State government has brought us to our mental and economic knees by it's quasi quarantine, now it seems determined to crush whatever fight we have left.

Great! Victoria has the best Covid recovery record; but at what cost Mr. Andrews, what cost?
