YOUR SUBMISSION

Submission:

The Victorian lockdown has been nothing short of catastrophic. Not one piece of medical or scientific evidence has been given to us to provide proof of the the effectiveness of these draconian lockdown. I am usually quite a happy person. I'm a busy mum and business owner. I gave birth to our second child during the peak of the " first wave". That was a hard and very emotional time where we really feared the unknown. But we got through it.

The Victorian wave and it's rules were nothing like the first. Seeing a pregnant woman being handcuffed because she was simply discussing a protest was terrifying. A sense of fear, sadness and loneliness has overcome everyone I know. I don't know one person who isn't a bit depressed due to this lockdown. Every morning you wake up with a lump in your gut - wondering what tyranny Daniel Andrews is going to place on you that day. What lies are going to be told and what horrible punishment is he going to put in place today.

That's what I see his " roadmap " as. Punishment. At least that's what it feels like. I miss my family. I miss my friends. It's hard to not have anything to look forward to. Even just an hour at the hairdresser or gym to feel yourself again.

And still to this day I do not know one person who has had Covid. But I know of people who have committed suicide. I know

people who for the first time in their lives are taking antidepressants. I know people whose businesses have been closed. I know people whose relationships have ended due to the hardships of the lockdown.

Daniel Andrews says he has protected us. I'm just not sure of what exactly ?

Do you have any additional comments or suggestions?:

End the lockdown.

Open up all businesses.

Get rid of the 5km rule.

Retract omnibus.

SACK DANIEL ANDREWS and take him to court for manslaughter charges and crimes against humanity.
