YOUR SUBMISSION

Submission:

The VIC governments response to the pandemic has been a farce. The second wave was completely down to their incompetent handling of the hotel quarantine and they should be facing manslaughter charges. They are corrupt (how did a company get a \$30M contract 6 hours after they decide to use private security - they weren't even on the preferred supplier list) and they have lied to their own enquiry (which is biased and not doing a thorough job). They are ignoring independent and expert advice and their measure are extreme and too harsh in response to a virus that we now know 99% of people recover from. The premier and his cabinet should face criminal charges for manslaughter and be sacked for incompetence. We know how much people's mental health is suffering but they keep ignoring outside issues and just focus on the numbers for the virus. there are many other considerations other than the virus and yet they are choosing to completely disregard any of these.

Do you have any additional comments or suggestions?:

Take away the premiers powers that were given to him by people who did not think about the wider impacts. The State of disaster needs to stop. The only disaster is this government.
