YOUR SUBMISSION

Submission:

The 8 ministers of the Victorian Labor Party who attended the inquiry regarding their handling of the disastrous quarantine and blatantly lied to cover their own positions need to be removed from Office. They single handedly are responsible for the subsequent deaths of over 800 people in Victoria and for this reason they must be dismissed starting with the Premier as he has already taken responsibility for this failure.

Do you have any additional comments or suggestions?:

Victorias economy has been decimated by incompetent handling by the current Government in Office and they continue with draconian handling and lockdowns. This situation cannot continue as Victoria is now in a very dire state of affairs. We must be allowed to try to recover now. The Premier is on a mission to destroy Victorians, he is clearly dysfunctional and possibly deranged.
