Good afternoon, I am 17, I have went to parlement to the protest that was held. I have been looking at the fear mongering that has been happening at the start of the pandemic I saw on the news poeple dropping dead on the street everywhere is china! This scared me knowing, I am very young and have my whole life ahead of me and I was thinking about what my future could be like! I started researching about what's happening, as the months went on I realized no body is dropping dead on the street! We have lost our freedoms and right ! Our elderly are dieding alone without family beside them on with the time they had! I have went to every protest to try and see a Perspective that not spoken of on the news? I was kettled in a large crowd! What I witnessed was horrific elderly close to passing out of the heat with no water! Then police in blacl uniform going into the group of 6 grabbing.us one by one by the neck, throwing poeple to the ground that showed no violence!

I'm scared of what my future will look like and no more because of a Virus but living within modern day communism! Were if you speak against a specific Agenda that may not be for the future generations!
