

Inquiry into the Government's response to the Covid-19 pandemic

YOUR SUBMISSION

Submission:

I'd like to see a review/investigation into Local Government response to C19. There has been no standard response throughout the state. Some taking a "business as usual" response. Many have acted responsibly others taking the opportunity to reduce the leave pool forcing staff to take leave when they should be working. - many nit allowing staff to work from home because "the stare or federal governments have not given councils a lawful directive for employees to work from home'. Ignoring EBA's etc

Do you have any additional comments or suggestions?:

Year 7 children would also have benefited from returning to school in the first round. They are still finding their feet in high school.

Stay at home should have expanded to primary residence. The amount of people in Echuca From Melbourne - up and down constantly has been ridiculous I'm surprised we have not seen an outbreak up here.
