YOUR SUBMISSION

Submission:

hi duck shooting for fun is very disturbing about 4 years back i witnessed some thing very disturbing this was the mass destruction of coots and swans..not only ducks at greens lake near corop victoria...the koots had been stomped into the mud under warter to hide there little dead bodys so to had the swans been killed and an atemp with the same method to hide them...i took all the coots and swans to the department of natural resorses but never herd back from them.the following year shooters had littered the waters with cartrage shells and were elegaly hurding the birds toward the shooters with a boat in a non boating area...this killing caled a sport MUST stop...also i have experianced land owners asked by shooters if they could go on to their property.the land owners say oh go see that guy over there and then that land owner says the same.this is a tactic they use to waste the shooters time and perhaps save some birds.the land owners do not want them round.

Do you have any additional comments or suggestions?:

these birds just want to live and be with their partners and babys.they need you as policy makers to protect them from evil.
