---

To the Committee members,

For many years I have been interested and involved in the Birdlife of Westernport. Being of rather mature age I am no longer able to participate physically but am still deeply interested in the welfare of Westernport and it's habitat.

I have made many contributions to the creation of the Westernport Ramsay site so am deeply concerned by the current AGL proposal to bring a Floating Storage and Regasification ship to Westernport Bay. I feel this ship presents a real threat to Westernport's fragile mangrove ecosystem. This is the most southerly mangrove system in the world and is home to threatened migratory birds like the Eastern Curlew.

Wetlands play a vital role in the functioning of global ecosystems and Victoria is blessed to have diverse wetland environments, all with unique characteristics, plants, animals, fish and insects.

Thank you for the opportunity to make the committee aware of my concerns about the proposed AGL ship and also to share my passion for wetland conservation across Victoria.

I look forward to great outcomes for our wetlands as a result of this inquiry.

Yours sincerely,

Valerie Curtis
