RE. PROPOSED WIRE ROPE SAFETY BARRIER SYSTEM

Dear Mr Herdman

I refer to recent conversations between yourself and VicRoads Officers regarding your intention to develop a wire rope safety barrier system that is more motorcyclist friendly.

Your intention to develop a wire rope safety barrier system that is still effective but more motorcyclist friendly is welcomed by VicRoads. There are currently six different systems of wire rope safety barrier accepted for use in Victoria. These systems were accepted for use after an assessment process to ensure that the system conforms to relevant requirements and standards, in particular AS/NZS 3845:1999.

VicRoads will consider accepting new wire rope safety barrier systems that are more motorcyclist friendly providing that the system meet VicRoads' requirements and standards.

Should you have further queries regarding this matter, please contact Mr Thuan Nguyen, Senior Engineer on telephone number 9854 2886.

Yours sincerely
