Subject: No jab no pay and my rights as a human.

Introducing this bill means that you are stripping rights from children and their parents. Force medication something that should have stripped with Hitler. I shouldn't have to be penalised for choosing not to medicate my children. My son had a terrible reaction to his vaccines, even though the doctors only call it a coincidence (but have no idea what caused it), so would be forced to continue to vaccinate and injure him further.

I am begging you to not allow this to go any further. The blood of hundreds of vaccine damaged children (like mine) will be on your hands if you do.
