Subject: Senate Inquiry Jo job no play

Dear Senate,

I'm writing to you to point out how the proposed legislation will contradict the 'Charter of Human Rights and Responsibilities Act 2006'.

8 Recognition and equality before the law

(2) Every person has the right to enjoy his or her human rights without discrimination.

It is a right that every child can attend childcare or kinder regardless of their circumstances, to limit admission to those who have an up to date vaccination status is discrimination.

It says **EVERY** person.

10 Protection from torture and cruel, inhuman or degrading treatment

A person must not be-

(c) subjected to medical or scientific experimentation or treatment without his or her full, free and informed consent.

No long term study of damage caused by vaccines and no safety study of the current vaccine schedule has ever been done. No one knows how their child will respond to a vaccine. The same vaccines that are given to fully grown men are given to new born babies, IT IS EXPERIMENTATION.

By attaching the right to attend kinder or childcare and not receiving government money to whether a person is or is not vaccinated is not 'free consent'. Its blackmail.

By Blackmailing someone into vaccinating that is not 'full' consent and I wonder how a doctor could still vaccinate someone's child in knowing that this legislation is their only reason.

13. Privacy and reputation

A person has the right—

(a) not to have his or her privacy, family, home or correspondence unlawfully or arbitrarily interfered with; and

By having a kindergarten aged child not attend kinder everyone will know that they are not vaccinated. This will be the precursor to a lot of discrimination suits. I really worry how this will affect the children when they attend school. I have witnessed a lot bullying from the 'pro vaccine'

community and I have no doubt this will be passed onto their children who, in the past have been innocently unaware of their friend's vaccine status.

14. Freedom of thought, conscience, religion and belief

(1) Every person has the right to freedom of thought, conscience, religion and belief, including—

(a) the freedom to have or to adopt a religion or belief of his or her choice; and

Parents who do not vaccinate their children have VERY strong beliefs, be it and not at all limited to

Moral issues- aborted baby parts

Health issues- not wanting their child's immune system damaged by the toxins in vaccines

Religious issues- not wanting to interfere with Gods perfect creation.

By tying financial benefits and kinder/childcare entry to the administration of vaccines you are taking away parents freedom to his or her choice.

(b) the freedom to demonstrate his or her religion or belief in worship, observance, practice and teaching, either individually or as part of a community, in public or in private.

By excluding children from childcare and kinder and penalising them financially for not vaccinating you are taking away their freedom and rights to demonstrate their belief in observance and practise

(2) A person must not be coerced or restrained in a way that limits his or her freedom to have or adopt a religion or belief in worship, observance, practice or teaching

To be coerced into vaccination, by financial means or restriction into kinder and childcare centre's, takes away and limits ones beliefs in not vaccinating.

18. Taking part in public life

(2) Every eligible person has the right, and is to have the opportunity, without discrimination—

(b) to have access, on general terms of equality, to the Victorian public service and public office.

Kindergartens and childcare are funded by the government for all children, regardless of race or religion or annual income or where they are immunocompromised or very healthy, on general terms of equality. If this legislation goes ahead the children who are up to date on their vaccinations will be discriminated against, this will be based solely on the fact that they have not been vaccinated.

21. Right to liberty and security of person

(1) Every person has the right to liberty and security

Every child has the right to attend childcare or kinder regardless of vaccination status. It would be very sad if you had a child soo ill that they could not be around ill children, however if kinders could really put pressure on the parents to keep their ill children at **home** then the un vaccinated would not need to be discriminated against. If it's the fear the immunocompromised will catch things that the children have no symptoms for then that would be irrelevant whether the children are vaccinated or not.

Every parent has the right to receive financial benefits regardless of their child's vaccination status. It is senseless to withhold money from people as a form of blackmail to conform to the majority's beliefs in the benefits of vaccination.

There are soo many things wrong with the proposed legislation, please up hold basic human rights and throw this 'no jab no play/pay' out of government.

Yours sincerely

Naomi Sherman
