Dear Comity Member,

I regard, that changes to Social Services Legislation Amendment is tantamount to assault on the most vulnerable in our society, denial of fundamental human rights, especially to freedom of thought and religion.

The extension of this legislation to affect all children under 5 from receiving early childhood education unless they adhere to a government mandated vaccine schedule is abhorrent. +

Vaccine damaged children are left by the wayside, as are grieving parents to pick up the pieces. Denial and coincidence are used as weapons by the medical establishment against parents who watch their children harmed or killed by vaccination.

This legislation takes away the rights of parents to informed consent but it opens a conversation that we as a society should be having about vaccination. We should not blindly trust pharmaceutical companies that make billions of dollars profit from vaccination. If the government is going to have a register for vaccination then this register should also record all vaccine reactions from minor to major, all deaths, and linked to Medicare to provide data about the short and long term effects of vaccination on both the vaccinated and unvaccinated and the collated data should be made publically available online and be independently audited.

There will be many unintended consequences of this legislation, as parents will be caught up in the need to catch up on vaccination in order to receive placement. This catch-up interval of 6 months will put many lives at risk and cause grievous bodily harm to a whole generation of children. Parents will no longer be able to make decisions to selectively vaccinate, delay vaccination, or refuse all vaccination based on their child's individual needs because of these coercive policies. The rights of the child is diminished when you diminish the rights of their parents.

Vaccines carry risks and parents have the right to be informed of the risks with at least a 10 business day cooling off period to fully consider whether or not to vaccinate their child. Ultimately, they and their children will bear the consequences of that decision. Doctors should be mandated to document all health issues and health status prior to and after vaccination. There should be a website and forms available to report vaccine reactions and data collected. Doctors should face criminal prosecution for injecting babies and children with adult vaccines, incorrect vaccines, and when they do not follow due process and inject sick children with vaccines causing serious reactions and damage or vaccinating premature babies. Pharmaceutical companies should be held liable for vaccine damage and death. Families of vaccine injured children should be given immediate financial support and not left to fend for themselves. Doctors should not be allowed to write off injury, death or reactions to vaccines as coincidence and it should be mandatory that all deaths of babies be investigated for whether vaccination contributed to or caused the death.

The death or injury of a vaccinated child should not be considered collateral damage.

Parents must retain the right to conscientious objection. They should retain the right to refuse to object without financial or other penalty to injecting their children with human albumin, human diploid cells,

residual components of MRC-5 cells including DNA and proteins, bovine serum, hydrolyzed gelatin, and chicken embryo, monkey kidney cells and calf serum, vesicle fluid from calf skins, human diploid cells from aborted fetal tissue, thimerosal, sorbitol, formaldehyde, polysorbate 80 (Tween-80), ammonium sulfate, formalin, and sucrose and many other chemicals and neurotoxins that have unknown consequences in each individual.

I trust you'll review your stance on this issue.

Regards,

Valeria Elliott
