1. The right of the unborn child to life; 
   If the child could speak, would he not say 
   don't kill me mummy? Parents worry about a 
   splinter, sneeze, etc after the birth, but if they 
   could understand, that the unborn child has 
   rights also, but unable to express them. They are 
   at their Parents mercy, which is devastatingly unfair 

2. the right of a baby born alive after a failed 
   abortion to full medication attention and care 
   aimed at preserving the life of the baby 

3. The right of women Personal choice, after such an 
   incident of having a baby, of what could be, to no 
   "What is" needs to be completely changed in 
   thought, Word & deed and see that a life has 
   entered the world and attitudes need to be 
   changed, so that the child can now have hope 
   of a life, which was meant to be from the time of 
   conception 

   Answer: In every operation there is risk, and Trauma, then 
   years of having lived with your conscience, 
   When you look at a child that would be the 
   same age as yours, would have been, the choice 
   cannot be overturned and damage of depression, 
   guilt have been one of the consequences to a 
   Woman who has not the experience to fully know 
   the depths of her actions.
4. The right of freedom of conscience for Doctors to make professional decisions and not to be forced to refer for abortion.

Answer: Doctors are here in this world to do their best and say so in their "oath" to save lives and yet pressure is being put on them to do the opposite, this should not, and must not be, otherwise, their oath is in vain is it not?

Thank you

Yours Sincerely

Ms Lee Roberts.
