FROM MISS MARIA. A. KOLOVRAT

ATTENTION Bridget Noonan  
Secretary  
Standing Orders Committee  
Legislative Assembly of Victoria  
Parliament House SPRING ST  
East Melbourne Victoria 3002  
Australia.

To whom it may concern,  
Thankyou for informing me about the Standing Orders  
Committee Submission Inquiry in the use of social media  
and members reflecting on the office of the speaker. I  
have prepared another submission addressing the terms  
of reference as requested, which can be submitted in considered  
optional method of a late submission, Thankyou very  
much.

Inquiry into use of social media in the Assembly and  
members reflecting on the office of speaker.

The Legislative Assembly Standing Orders Committee  
is considering:

1) should any restrictions, or guidelines, apply to members  
use of hand-held electronic devices in the chamber  
and committees, including assessing social media  
to comment on the proceedings?

The Guidelines I find through my theoretical studies and  
Research are that the Restrictions and guidelines that  
apply to members use of hand-held electronic devices  
that can be hand held computer or smart phones, that  
keep you and I connected, Pda's, cell phones,  
MP3 players by Human Factor Engineers, Electronic  
Bibles, hand held electronic devices come in dif-  
ferent varieties / colours to suit the needs of language,

Professional Interpreters, it's wireless too! Which makes it very good, convenient and very unrestrictive, because it's user friendly, hand held Electronic Devices are assisting emergency/medical dept. Previous study investigated the viability of using a wireless handheld electronic device to provide a critical information. It has the good potential to carry Reference Materials in Handheld Electronic devices, they're good because the hand held electronic devices (they're like personal digital assistants enable clinical staff to carry medication reference information. A good electronic Dictionary handheld device offers alot of guidelines especially with its Google assistance availability service for pocket multilingual talking dictionaries too, hand held electronic translators. Best are these electronic devices for Language Learning and communication. This is a world where technology is available right at our fingertips, all the time, also it can be fun too hand held Electronic Poker Games are fun, and make a great deal of gifts for Poker Enthusiasts of all ages. So there should be no restrictions, or delays applied to members use of hand-held electronic devices in the Chamber and committees including accessing social media to comment on the proceedings! Also the basic guidelines to using the Electronic device is to make sure it's always recharged and ready to use, and that it has its service on "Activated" and it funds readily available. Also if the service switches off or becomes invalid the device is still workable by just purchasing another Sims Card for \$2.00 (two dollars) of itsame kind, and you can still keep the same Number on, and just reactivate to the service operator and simply having a \$30/\$40 or a \$50 dollar voucher to get it all up and running again. Thank you very much! The same is for Notebook mini you just Replace the New Valid Intel Intem.

② Should any restrictions, or guideline, apply to the public and Media using social Media from the Challenges to comment on proceedings or committee hearings? Well sort of a little pre-wall poster Ruling maybe on Info Flyers around Parliamentary Tables things you can do and things Not to do when using these great Electronic device simple as that but do not deny any of these technologies to anyone, good, thank you very much. A guide line but not a tight restrictive attachment because for example of this simple incident that had recently occurred in our Vic parliaments:

Eg: → "Vic PARLIAMENT TO INVESTIGATE  
(By Luke HOPWELL 2011) TWITTER USE"  
NET Australia December 12<sup>th</sup> 2011

The Victorian Parliament is set to consider the appropriate use of hand held devices and social Media sites like Twitter during Parliamentary proceedings, after one MP the Service to criticise the Speaker during a parliamentary sitting. The Victorian Legislative Assembly Standing Orders Committee will investigate whether it is appropriate that MPs comment on proceedings and whether the House rules need modernization as a result of the New technology. Added 14/02/2012 special guidelines that offensive incidents like this don't occur. Thank you very much!

3) Do the Assembly's procedures and Rules need modernising to reflect the opportunities and Challenges provided by social media? Yes of course, it is important to study the needs and methods for modernising, harmonising and co-ordinating

private and in particular commercial law principles and rules to achieve those objectives. Contributions must be made to fund specific projects or activities, an annual contribution from off shore Governments, from their Extra-budgetary. Also the Education sector needs to be modernised, Relatively small size of some organisations, schools! Wise spendments for social media that encourages more purchases through Bpays Direct debit, Direct deposit only for compensations and wages and Credit interest that should from small be larger, bigger than you!

Modernizational space age technology to be incorporated into parliament etc enlighten us! Also easier candidating options to open your office at Home or Near too!

A) is the current rule, preventing any reflections on the Office of Speaker, other than in a formal motion, still appropriate, No because with the modernization of Assembly's procedures and rules it all takes care of itself especially when it's a space age symbol technology "they say" "IT KNOWS"!  
 Thank you very much!

Yours Sincerely

MISS MARIA ANN KOLOVRAT
